

Towards Safer Therapies

In the heart of the science and business location Heidelberg, GeneWerk GmbH has found ideal conditions for steady growth. For six years, the company with its experienced and motivated staff has been offering NGS-based molecular biological analysis services, especially for companies in the pharmaceutical, life sciences and biotechnology industries. The aim is to advance the development of innovative therapies such as gene and immunotherapies through comprehensive safety analyses. Safe and effective therapies are thus within reach for many diseases.

With the help of the investor Ampersand Capital Partners, GeneWerk will push ahead with its expansion in the USA in order to better serve the rapidly growing American market.

We are looking for a dedicated individual to join a great team as soon as possible:

IT Manager (m/f/d) in part-time or full-time

Spectrum of Tasks

- Manage end-to-end accountability for all matters involving IT infrastructure and cybersecurity for the company;
- Define and implement IT strategy and guidelines to match the company's continuous growth;
- Coordinate maintenance and development activities with the off-site system-administrator team and external IT suppliers;
- Ensure adequate security and compliance of IT systems as per industry requirements;
- Plan and implement integration of laboratory equipment into the company's IT network;
- Provision computer equipment and user accounts for company employees;
- Conduct IT-related training sessions;
- Oversee day-to-day operation of the office network and the computing cluster;
- Take charge of IT-related personnel and resource planning.

Requirements

- University degree in Information Technology or related field;
- Experience as a Linux system administrator, preferably with computing and storage clusters;
- Working knowledge of managing Windows server and client systems, as well as Active Directory domains;
- Scripting experience in Shell, Perl or Python;
- Working knowledge of AWS and/or virtualization platforms would be a plus;
- Willingness to lead the IT department and to work collaboratively with external IT partners;
- Ability to work independently and without supervision;
- Fluency in both German and English.

What We Offer (i.a.)

- Pleasant working atmosphere;
- Professional and personal development opportunities.

We are looking forward to receiving your comprehensive application via e-mail to:
